DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1 lines 5-7, the meaning of "channel state value" is unclear from the specification. Thus, it is not clear what is intended to be covered. Claims 8 and 11 have the same ambiguity as claim 1, where claim 8 uses the term "channel state measurement".

Please make appropriate corrections to more clearly define the meaning of "channel state value" and "channel state measurement."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shiino (Patent No. 6,452,936) discloses a control unit 300 in Fig. 1 that has a novel frame configurator 310 that adapts the transmitted frame configuration to channel conditions. Shiino includes three frames, each one longer than the other. Odenwalder (Pub. No. US 2002/0097780) discloses a communication system that determines a packet size and compares it to a predetermined threshold as described in the summary of the invention, paragraph 15.
